

AI Receptionist

24/7 virtual call assistant that answers, routes, and assists callers with natural, human-like conversation.

Always On, Always Professional

Your business stays responsive 24/7: every caller is greeted instantly and consistently, no matter when they call.

Frees Up Your Team

Offload routine calls and FAQs so your staff can focus on higher-value conversations that drive revenue and customer satisfaction.

Easy to Add, Easy to Grow

Start small with after-hours or overflow calls, then scale at your own pace. No new systems, no disruption, just smarter call handling from day one.

How It Works

- 1. A Call Comes In:** The AI Receptionist greets the caller in your company's voice.
- 2. Understands the Request:** Uses natural conversation to determine intent (like scheduling, billing, or support).
- 3. Takes Action or Routes:** Provides information, takes a message, books an appointment, or transfers to a live agent.
- 4. Follows Up Automatically:** Sends SMS confirmations or notes for your team when needed.
