

Microsoft Teams Calling Integration

TeleCloud's Microsoft Teams integration brings your full business phone system into Teams, so your team can make and receive calls, send business SMS, and manage voicemail without ever switching apps.

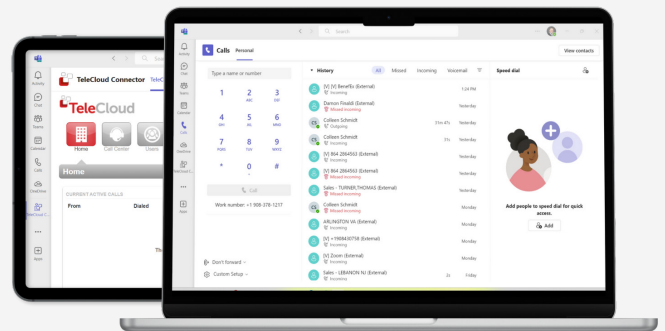

Everything your phone system does. Now built into Teams.

Your team already lives in Teams. TeleCloud makes sure their business phone lives there too, with all the features Microsoft's native calling won't give them.

Microsoft Teams Integration

Make and receive business calls with your existing TeleCloud number, directly inside Teams. No new hardware. No new apps. No app switching.

What You Get with TeleCloud for Teams

Business Calls in Teams

Call and receive with your existing TeleCloud number, right inside Teams.

Visual Voicemail

Listen, read, or download transcribed voicemail without leaving the app.

SMS in Teams

Send and receive business texts through your TeleCloud inbox in Teams.

Reporting Stays in TeleCloud

Every call logs in your TeleCloud portal. Your data stays yours.
