Common Challenges We Help Solve

- 01 "Our service experience is frustrating, inconsistent and below standards"
- 02 "The phone system we are using is not supported, end of life & risky to keep"
- 03 "We want to reduce our monthly telecom expenses while improving the technology"
- 04 "We require new and powerful voice technology because our current system is holding us back"
- 05 "We need a provider to work with us after an acquisition and/or office relocation"

TeleCloud is built to fix exactly that.

Modern cloud communications. Local experts who pick up the phone.
A partner who stays invested long after the install.

THE TELECLOUD DIFFERENCE

White Glove Installation and Service Experience

Voice & SMS Intelligence Specific to your Business

Customizations & Integrations for you

OUR STORY

Founded in 1982.
Still run like it matters.

Michael Finaldi founded TeleCloud in 1982 with a simple belief: "The customer is King."
Decades later, TeleCloud has evolved into second-generation ownership, led by Damon Finaldi, Vincent Finaldi, and Cara Miscia.

TeleCloud is headquartered in Morristown, NJ — a strategic base for serving customers across the region.
